One of "Telegraph" licensees, in Berlin. (Brit. license.) Reportedly will be a member of news agency working for Telegraph, in reality cover for Dutch Secret Service headed by SWART, Jup (qv).

-----gee

Subject, left-wing of SPD, has always endeavored to get on well with Communist officials and is secretly opposed to Dr. SCHUMACHER whom he considers too conservative, although he is aware that he is good attraction for German and British conservative elements. A leading man among SPD leaders with great hold over other SPD officials. His policy is to retain those mentally inferior to him and eliminate those who surpass him. Comes from Communist background and is communist at heart. Subject and von EYERN, Chief of the econ. section of the TELEGRAF, met through Konrad MONSEN who works at ONCUS. Both are reserved and may become a potential danger due to the fact that they do not disclose their real inclinations and are, thanks to their outwardly correct bearing and S D membership, occupying leading positions in the central administration and other high German offices. Both are also anti-American.

Info from biased reporter on TELEGRAF who is completely distrustful of SPD leaders, tho SPD member herself.

Life cover

Editor in chief and licensee of the TELEGRAF in Berlin. GF- 38
Militant spirit, vitriolic pen, technical knowhow of print- 24 Jun 47
ing and publishing. Repulsive looking, dark complexioned, dark
beard, about 40, fat, thick-rimmed glasses. Looks Jewish but
is not. Attended University of MAGDEBURG and BERLIN, graduating
from the latter in early 30's. Journalist by profession; expert
on printing and publishing techniques. Around 1936 established
a newspaper clipping service, until 1940, when fearing draft, left
Berlin for Magdeburg. From Magdeburg he moved about, one step ahead
of the draft, until in the winter of 1944, returning to Berlin, he
was conscripted into the Reichswehr.
Violently anti-Russian. No doubt as to his sentiments. Proud of the
stand the TELEGRAF has made against Russians and particularly vs. the
SED.

See document for connection of Subject with the reported British
sponsored anti-Soviet press Campaign which was prematurely re-
vealed through a security leak.

Further plans for the use of subject, who proposes that his value to the Americans could be greatly augmented through an increase in the scope of activities of the so-called "Eastern Bureau" of the TELEGRAF. This would require certain material assistance from the US authorities. In view of subject's background and the fact that the TELEGRAF is a British-licensed paper, it must be assumed that subject's proposition has been discussed with the British. It is suggested that Berlin SC be authorized to discuss this proposal with the British with a view of evolving a joint operation. For more complete details, see document.

To be evacuated under PASIME. Case officer: **E**

1. As publisher of the largest, most influential anti-Communist German newspaper, CAMLET is definitely persona non grata with the Soviets. His usefulness as contributor of political intelligence would, in the West, be probably greater than was the case in Berlin. CAMLET is not necessarily dependent on our facilities for evacuation, but we prefer that it be done under our auspices, to strengthen control and emphasize our continuing interest in him. We envisage CAMLET as one of the key figures in a possible intelligence operation aimed at the Tri-Zonal government.
